

# DH-7700

Paint film waterproof agent  
(One-component)

## DAEHEUNG CHEMICAL

**DH-7700 is pure acrylic emulsion. It forms elastic and tough water proofing membrane mixing with inorganic material. It features excellent weather-resistance, strong adhesiveness and elasticity also. It is environmental-friendly agent that doesn't cause any environmental contamination or poison.**

### 1. Uses

- Elastic waterproofing agent.
- Floor finishing adhesive

### 2. Characteristics

- Good elastic membrane waterproofing agent.
- Good flow characteristic and workability.
- Non toxic and odorless.

### 3. Physical properties

Properties	Value
Main component	Pure Acrylic Copolymer
Appearance	Milky white emulsion
Solid contents	60±2 % (at 105±5 °C, 3hr)
Viscosity	7,000~13,000 cps (at 25 °C)
Specific gravity	1.05 g/cm <sup>3</sup> (at 20 °C)
pH	6.0±0.5

### 4. How to use

- Dilute cement with water, and mix the DH-7700.(Use hand mixer or stir with a rod.)
- Coated evenly using a brush, roller or the like.
- The applied thickness is suitably in the 1.5 ~ 2.5mm.
- After the second coating(at least 12 hours after complete drying) waterproof construction, please tertiary waterproof coating.

## 5. Caution

---

- Avoid direct rays of the sun and keep in cool(5~25℃) and dry place.
- Keep at least 5 ℃ to avoid freezing.
- Please use After taking roll up the film before use, it may cause the coating to dry on the surface of the adhesive during prolonged storage.
- After use, please keep the remaining adhesive seal.
- If the use of glue spills, please wipe with a damp cloth. Don't carry out the construction if temperature is 5°C and below or humidity is 85% and above.

## 6. Packaging unit

---

- 18kg PE

Please contact us for further information or see Material Safety Data Sheet (MSDS) for this product.
