

DH-2000(코) NEW

DAEHEUNG CHEMICAL

Primer

DH-2000(코) NEW is water-born synthetic rubber base adhesive, which is excellent in workability and not to include organic solvent so not concerned about toxicities.

This adhesive is use for as a water-born primer when pressure-sensitive adhesive PVC film.

1. Uses

- When PVC film (interior film) bonding, as a primer.

2. Characteristics

- Excellent in initial bonding strength.
- Not flammable.
- Not addictive for organic solvents.
- Depositing a porous material, even for excellent adhesion performance.

3. Physical properties

Properties	Value
Main component	Synthetic rubber latex
Color	Milk-white and viscous liquid
Solid contents	50~54 % (at 105±5℃ x 3hr)
Viscosity	2,000~2,400 cps (BF#2, 20rpm, 20℃)
Open time	5~15 min (at 20℃)
Dilution material	Water
Specific gravity	Above 1.0~1.1 g/cm ³ (at 20℃)
pH	6~8
Shelf life	9 months in unbroken package under dry and cool condition

4. How to use

- Remover all dirt, grease, water and rust from the surface before applying.
- Please adhesive after drying is applied to the substrate to bond the PVC during FILM adhesive film.
(MDF, Iron plate, etc.)

5. Caution

- Avoid direct rays of the sun and keep in cool and dry place.
- Store at room temperature.
- Keep out of reach of children.
- Close the cap tightly after using it.
- Don't use except for the original purpose.

6. Packaging

- 1kg, 3kg PE

Please contact us for further information or see Material Safety Data Sheet (MSDS) for this product.
